Nikolaj Fløjgaard

Sr. Integration Architect @ TDC NET

København, Region Hovedstaden, Danmark

Resumé

I am dedicated to delivering solutions that are simple, adaptable, and easy to maintain. With a passion for management, I continually seek to enhance my skills and inspire my team to achieve collective success.

Core Competencies:

Architecture & Solution Design: Expertise in creating robust, test-driven designs.

Business Acumen: Deep understanding of business processes and application ownership.

Leadership: Practicing servant leadership to foster a motivated and cohesive team.

Technical Proficiency: Skilled in Java, REST, Mulesoft, Kafka, and JIRA.

Agile Methodologies: Experienced in Agile/Scrum and SAFe frameworks.

Erfaring

TDC NET

3 år 4 måneder

Senior Integration Architect

maj 2025 - Present (10 måneder)

Integration Architect

november 2022 - april 2025 (2 år 6 måneder)

At TDC NET, we are paving the way for the future with a cutting-edge IT landscape and architecture. Leveraging integration platforms like MuleSoft

and BOSS (K8 & Java microservices), we ensure secure and efficient operations. Recognizing that not every challenge can be addressed with a single tool, we employ multiple platforms to find the best solutions. Each task is meticulously evaluated through our design template to determine the optimal implementation strategy.

I firmly believe in the power of teamwork. It's essential to push back and say no when necessary. Upholding our high standards is non-negotiable. Instead of compromising on requirements, we focus on refining processes. We are committed to maintaining system integrity and avoiding shortcuts that compromise quality and security.

Telia

Solution Architect - Attended engagement
august 2021 - oktober 2022 (1 år 3 måneder)

As the Solution Architect for Attended Engagement at Telia, I am setting the strategic direction for a new IT stack across the Nordic and Baltic countries. My role involves implementing new target TMF APIs across these regions, fostering integration and breaking down country-specific silos to create a cohesive architecture within Telia.

My technology stack includes:

ServiceNow

Salesforce

ACE

TOCA

eTray

By leveraging these platforms, we are building a unified and efficient IT landscape that supports our regional operations and enhances our service delivery.

Department: BSS, Attended engagement - Customer care.

Area: Denmark, Sweden, Norway, Finland, Lithuania and Estonia
